☐ MSS(pappA & beta hCG)  
☐ Genetic Carrier Screening

- ☐ Nuchal Translucency Screening  
(MSB indication risk of fetal  
abnormality) +/- Genetic Counselling

- ☐ Genetic Counselling  
Consultation

## INSTRUCTIONS

Most gynaecological scans & early pregnancy scans (<12 wk) will be performed internally (transvaginal) which produces a better image and more information, therefore you will not require a full bladder. If this technique is not appropriate for you, please let our staff know that you will need an abdominal ultrasound and attend with a full bladder.

Mid (>15 wk) and late pregnancy scans require a comfortably full bladder: 2 glasses of water 1 hour prior to your appointment.

Full payment is required on the day of your appointment. We accept CASH, CREDIT CARDS & EFTPOS.

- The clinic welcomes all family members when an ultrasound is required. We believe that pregnancy is a family experience and all concerned are welcome.
- 3D/4D obstetric ultrasounds are performed routinely but image quality is dependent on baby position, views and maternal shape and size.
- This referral can be used at any appropriate imaging provider after discussion with your doctor
